

A three-dowel method is often used for locating a part in the fixture. In this project, the objective is to calculate the dimensions A and B from the supplied data.

- ➡ As an extra challenge, calculate the dimensions to a five decimal accuracy

	<p>Calculate dimensions A and B to a 5-decimal accuracy</p> <p>A = <input data-bbox="829 1087 1102 1157" type="text"/></p> <p>B = <input data-bbox="1170 1087 1443 1157" type="text"/></p>
