

27-01

Angular Hole Pattern

The following two exercises are related. They both show an angular pattern of equally spaced holes. The difference is in the method the drawings are dimensioned. The project is to make one program for each of the two patterns, spot drill only is sufficient. Although very similar in appearance, the hole patterns are *not* the same.

- ➡ Project 27-01a - The first and the last hole are dimensioned and no distance between holes is specified:

- ➡ Project 27-01b - The first hole is dimensioned and the angle and distance between holes are specified:
