

Again, the objective of this project is to calculate the absolute XY coordinates for the two unknown contour points in the drawing - *P1* and *P2*. This project is similar to 53-03, but requires two types of calculations:

- ➡ 53-04a Points **P1** and **P2** are calculated from the CENTER of the Ø2.127 circle
- ➡ 53-04b Points **P1** and **P2** are calculated from the LOWER LEFT corner of the part

Point	X coordinate from the center	Y coordinate from the center	X coordinate from the lower left corner	Y coordinate from the lower left corner
P1				
P2
