

This grooving project (similar to 36-01) represents a groove that is too wide for just a single rough plunge. The objective is to develop grooving toolpath for the 0.7 wide groove.

➡ To complete this project, follow these instructions:

1. Only the grooving program is required
2. Use 0.25 wide grooving tool
3. Aim for high quality groove
4. Material is brass
