The *Caribbean Journal of Mixed Methods Research* (*CJMMR*) is an academic, peer-reviewed, and multi-disciplinary open-access journal focused on studies utilizing mixed-methods research (MMR) approaches. We extend our platform beyond the Caribbean to include scholarly works from academics and postgraduate students that can address critical issues in the region as well as mixed methodological concepts and principles. This issue targets the mixed-methods Caribbean regional conference and we also invite other manuscripts for consideration in this fifth volume.
